

# **NAMESERVERS POINTING INSTRUCTIONS FOR bizbox4you.com**

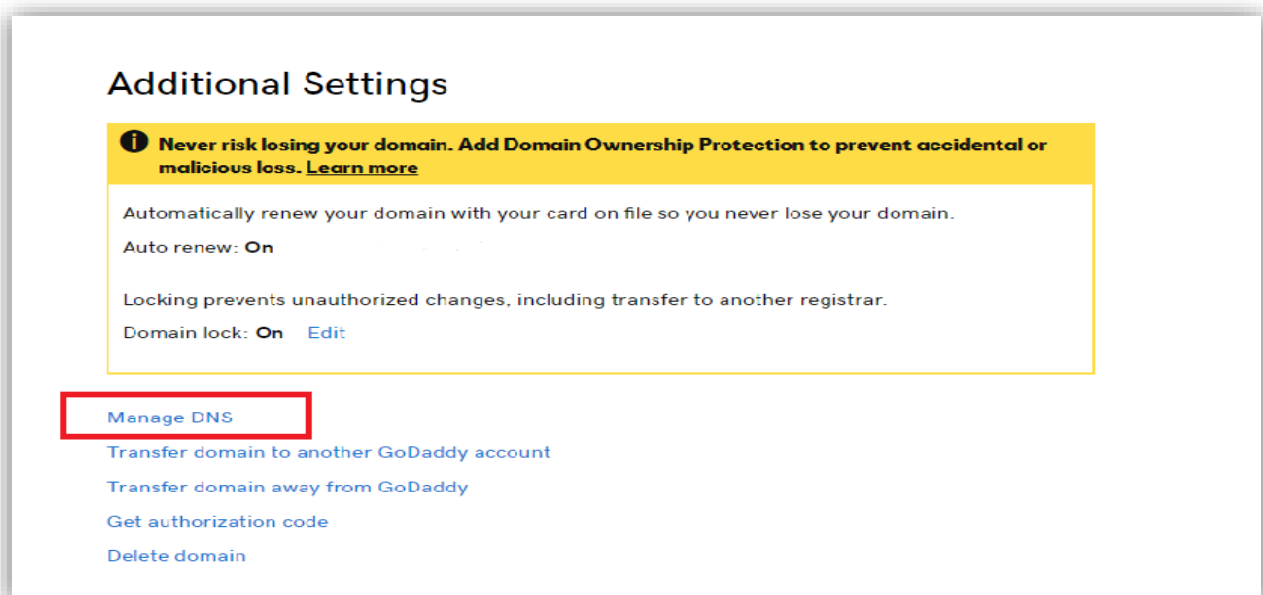

## This document describes the steps to be followed to point Rackspace Nameservers in Domain DNS Zone

Following examples are taken from GoDaddy (a leading DNS provider) control panel for your reference. In this example **bizbox4you.com** has been considered where Rackspace nameservers needs to be pointed.

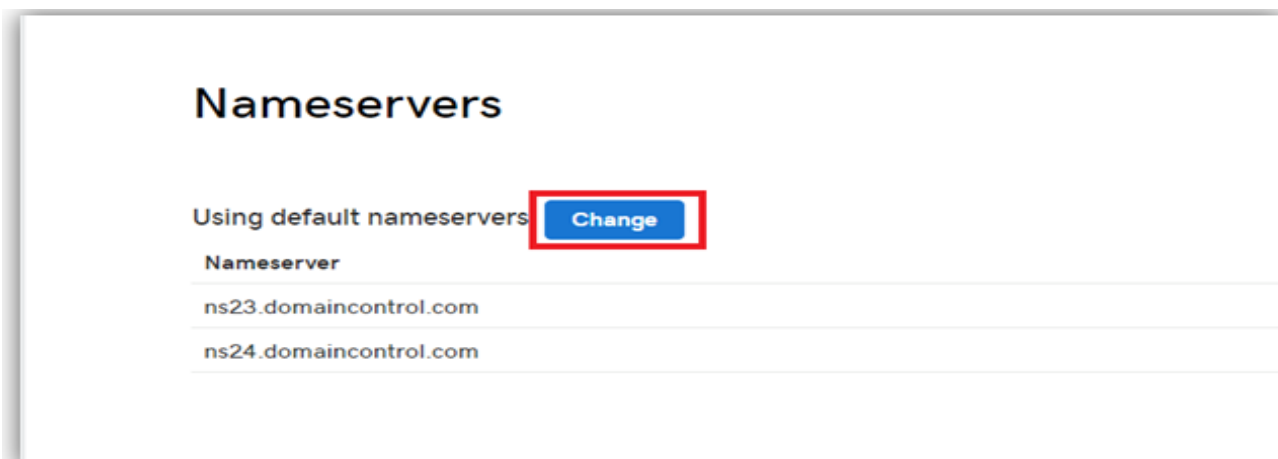

### **Step 1:**

Log in to your account <https://sso.godaddy.com/>

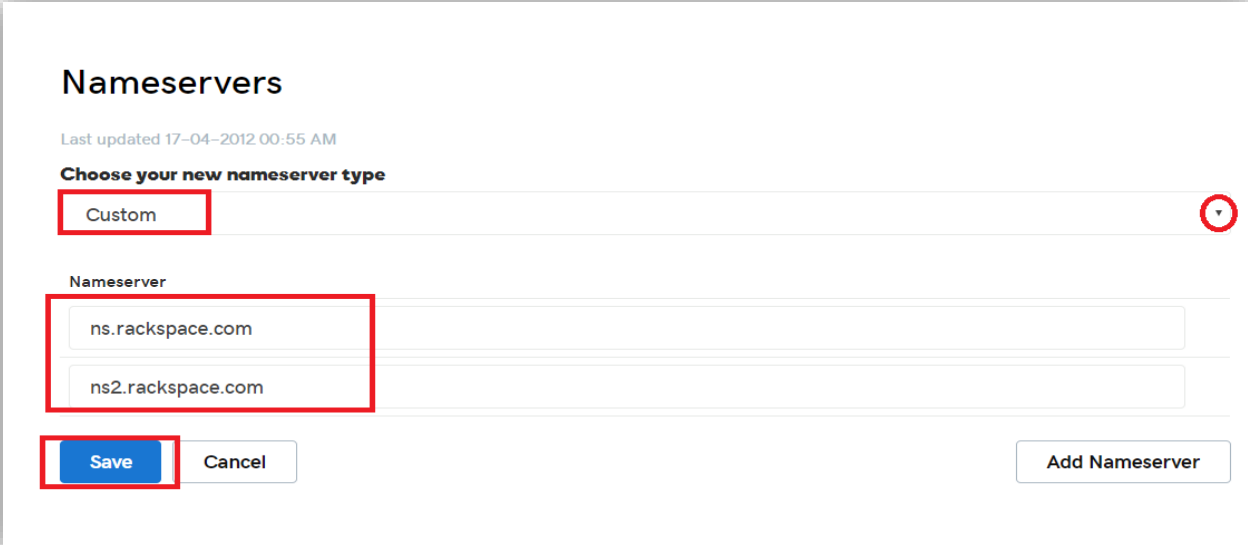

Click on My Product > Manage Domain> Select the domain you want to edit Navigate domain properties and click on **Manage DNS**.

**Step 2:** Click Manage to add/change Nameservers.

**Step 3:** Check the “**Custom**” type from the drop-down radio button.

The screenshot shows a web form titled "Nameservers". Below the title, it says "Last updated 17-04-2012 00:55 AM". The main heading is "Choose your new nameserver type". There is a dropdown menu with "Custom" selected, which is highlighted by a red box. Below this, there are two input fields for nameservers, both containing "ns.rackspace.com" and "ns2.rackspace.com" respectively, also highlighted by a red box. At the bottom left, there are "Save" and "Cancel" buttons, with "Save" highlighted by a red box. At the bottom right, there is an "Add Nameserver" button.

**Step 4:** Specify Rackspace name servers (**ns.rackspace.com**, **ns2.rackspace.com**) in the box and click on save.  
Give it some time to propagate the record globally.

**Thank You.**
